

Dirt Defence Waterseal

- WATER-BASED INVISIBLE PROTECTIVE SEALANT
- USES NANO-PENETRATION TECHNOLOGY
- QUICK CURING
- READY TO USE - NO DILUTION REQUIRED
- PROTECTS CALCIUM BASED SURFACES AGAINST MOULD & FUNGUS

Dirt Defence Waterseal is a high performance, penetrating, repellent sealer specially designed for porous roof substrates such as; concrete, clay, stone and most other calcium based materials. Formulated using the latest technology to give outstanding performance and durability.

BENEFITS

- Provides a hard wearing, invisible, protective seal.
- Can be used on both horizontal and vertical surfaces.
- Suitable for most natural and cement based substrates.
- No change to the texture or colour of the surface.
- Allows substrate to breathe so moisture can escape.
- UVA resistant.
- Resists the growth of mould and algae.
- Easy to use.

APPLICATION

- Always test a small inconspicuous area before use to ensure the final results are satisfactory.
- Shake container before use.
- Remove surface contamination. All algae and mould should be treated and removed using Enviromose Algae Remover.
- Apply neat with a brush, long pile roller or garden sprayer.
- Apply an even, wet coat at a spread rate of 4-5m² per litre. Once the first coat starts to soak in, apply a further wet on wet coat. This method gives deeper penetration into the substrate. Do not allow the product to dry in between applications. Avoid runs, drips or puddling by removing excess from the surface.

COVERAGE

4-6m² per litre dependent on the porosity of the surface.

CLEANING

Clean brushes, rollers and other equipment immediately after use with soapy water. Remove as much excess product as possible and clean tools and equipment immediately after use with soapy water.

STORAGE

24 months from the date of manufacture in original unopened container in a clean, dry area. Do not store below 5°C.
