

PHOS A + SP10 2 PART SYSTEM

Heavy Duty Acid Cleaner

PHOS A is a 2-part acid/base system for the refurbishment of oxidised substrates. Use in conjunction with SP10 alkaline neutraliser. PHOS A is ideally suited for the heavy duty cleaning/refurbishment of tiled, porcelain and natural stoneware. It is designed to clean and degrease the most oxidised surfaces.

How to use:

This product is specially designed for the refurbishment and to degrease and clean all synthetic and stone surfaces. Shake the container well before use. Ensure adequate ventilation at all times and wear protective clothing, gloves and safety goggles.

- Apply with a brush, long pile roller
- Be careful to mask off/protect all surfaces not intended to be treated.
- PHOS A- Use a low pressure sprayer to apply and then leave it to soak, allowing 5-15 minutes to work.
- SP10 (R26) - Use a low pressure sprayer to apply and then leave it to soak, allowing 5-10 minutes for the product to neutralise and clean the surface.
- Gentle agitation can be performed with a stiff brush prior to rinsing.

Extra Guidelines for use:

Apply products to the surface moving from bottom to top. Rinse fully with water following application of both parts of the system. The surface is ready to be treated or painted as soon as it has dried.

To prevent future soiling, it is recommended to use a suitable protective treatment.

Important

Always test a small hidden portion of the substrate before use, to ensure the final result is satisfactory and to calculate consumption. Keep out of reach of children. Keep in a dry place between 5°C and 30°C in the original container.

Cleaning of equipment:

Clean tools and equipment immediately after use with water. Always read safety instructions before use. Keep away from shrubs, plants and grass. Do not use on aluminium or marking may occur.

Storage:

Keep out of reach of children
Keep in a dry place between 5°C and 30°C in the original container.

Precautions for use:

For Health & Safety instructions, first aid measures, spillages and disposal instructions, see separate Health & Safety Data Sheet (MSDS).

Benefits:

PHOS A is a powerful alternative to shot blasting and erosive polishing techniques. It is Fast-acting, with powerful degreasing properties and has a non-flammable, non-caustic effect on building materials.

Product Characteristics - PHOS A

Colour	Clear
Odour	Characteristic Odour
Form	Liquid
PH	1
Shelf Life	24 Months from the date of manufacture in the original unopened container - keep away from children
Application Temperatures	Minimum +5°C Maximum 30°C
Coverage	Approx. 4 - 8m ² per litre depending on the surface.

Product Characteristics - SP10

Colour	Pale Yellow
Odour	Characteristic Odour
Form	Liquid
PH	13
Shelf Life	24 Months from the date of manufacture in the original unopened container - keep away from children
Application Temperatures	Minimum +5°C Maximum 30°C
Coverage	Approx. 4 - 8m ² per litre depending on the surface.
