

PROTECT + MAINTAIN

Fabric Protector

Dirt Defence Fabric Protector is a step forward in sealer technology. This water based, easy to use solution contains no wax or acrylics. Superior performance is achieved by using the latest generation polymer technology, to give improved performance and scrub resistance.

Our Fabric Protector is virtually invisible when dry and penetrates into the substrate so there is no need to use strong chemicals to maintain the appearance.

Surface Preparation:

Always test a small hidden portion of the fabric before use, to ensure the final result is satisfactory. Ensure the surface is clean, dry and free from any dust or debris

Precautions for use:

For Health & Safety instructions, first aid measures, spillages and disposal instructions, see separate Health & Safety Data Sheet (MSDS).

How to use:

- Spray an even coat
- Leave for 30-40 seconds
- Wipe off excess with a dry, soft cotton cloth or kitchen towel
- Leave surface to fully cure before subjecting to heavy use

Cleaning of equipment:

Remove as much excess product as possible and clean tools and equipment immediately after use with soapy water.

Curing:

Water repellence is evident after initial curing but may take up to 7 days to reach 100% efficiency.

Perfect for use on:

- Suede
- Cotton
- Linen
- Absorbent Fabrics

Benefits:

- Create an invisible protective seal against oil, grease and stains
- Uses nano penetration technology to go deep into the pores of the substrate whilst remaining invisible and breathable
- Reduce maintenance
- Resist water ingress
- Resist oil, dirt and grease staining

Product Characteristics

Colour	Clear
Odour	Barely Perceptible
Form	Liquid
Coverage	6 - 10m ² per litre
Application Temperature	Between 5°C and 38°C
Shelf Life	24 Months from the date of manufacture in the original unopened container
