

VOCure

AIR PURIFYING SURFACE TREATMENT

Cleaner Air. Cleaner Surfaces.

VOCure is an innovative, invisible surface treatment designed to protect and purify – all in one. Applied to concrete, stone, brick, roofing slate, and more, VOCure transforms ordinary surfaces into active air purifiers using nothing but sunlight and active ingredients within the formulation.

Using photo-catalytic technology with Titanium Dioxide (TiO₂), VOCure reacts with natural sunlight to break down harmful pollutants like Nitrous Oxides (NO_x) and VOCs (Volatile Organic Compounds) – converting them into harmless water, CO₂, and nitrates. Removes pollution to create healthier, cleaner spaces..

Precautions for use

For Health & Safety instructions, first aid measures, spillages and disposal instructions, see separate Health & Safety Data Sheet (MSDS).

How to use

This product is supplied ready to use and should not be diluted. Shake well before use.

Test a small inconspicuous area before proceeding, to ensure finish, compatibility and performance are acceptable. Ensure the surface to be treated is clean and free from dust, dirt, oil, efflorescence, organic growth, grease and old coating films. All cleaning detergents should be thoroughly rinsed away. Ensure all cracks are repaired using a concrete/mortar repair system.

- Apply using a low pressure spray, brush or roller.
- Applying the product from bottom to top on vertical surfaces taking care not to let the product run.
- All surfaces must be treated to saturation 'wet on wet' to ensure 100% product efficiency. This will vary dependant on the substrate and treating a small trial area is recommended to calculate true consumption.
- Initial curing will be evident after 24 hours. Allow to fully cure before subjecting to heavy use (7 days)

Storage

Keep out of reach of children. Store in a cool, well ventilated area. Keep container tightly closed. Storage temperature between 8°C and 30°C.

Ideal for use on:

- Building facades & heritage sites
- Pavements, walkways, & plazas
- Main roads, pavements and public plazas.
- Bridges, barriers, and urban infrastructure
- Roofing tiles & slate

Benefits

- Neutralises harmful gases and urban odours
- Removes allergens and airborne spores
- Helps reduce asthma and respiratory risks
- Inhibits mould and mildew growth
- VOCure™ forms a clear, breathable, water-based layer that doesn't change the appearance of the material – but protects it from pollution, weathering, and microbial growth.
- Dirt and pollutants can't stick – surfaces stay cleaner, longer.
- Efficiency lasts 20+ years with minimal maintenance.

Product Characteristics

Colour	Clear
Odour	Low
Form	Liquid
Application Temperature	Between 10°C and 25°C
Shelf Life	24 Months from the date of manufacture in the original unopened container
PH	8
Specific Gravity @ 25 °C	1.00
